

DR. PARAAMJEET CHOPRA, A MAN OF MANY GREAT TALENTS

**“THE
JUDGE”**

In the early seventies, Dr. Chopra was an original member of the USDF Education Committee with Chairman Joe Batten in Lincoln Nebraska. It was at that time that the initial foundation for dressage education and the learner Judge program was laid. He continues to actively participate in all USEF and FEI sponsored clinics. Dr. Chopra has been an USEF “S” Dressage Judge for nearly 25 years and an “FEI” International (I) Dressage Judge for nearly 15 years. He is very active in judging not only in the US but also in Europe. He has been invited to judge in Belgium, France and Holland, where he judged the Dutch Championship Arnhem. He has also judged the

Canadian Championships on tour in Montreal, Toronto, Calgary and British Columbia. Among the many shows he has judged in the past year, the 2008 schedule includes USEF/USDF recognized shows in Florida, Texas, Morven Park In Virginia, St. Louis MO., Wichita KS., Lexington, KY and many others. His judging schedule for 2010 reaches from Florida to the Hawaiian Islands.

He has studied with the elite of the European dressage instructors. He learned the importance of the correct development of muscles of the horse resulting from classical dressage training, enabling the horse to perform the prescribed movements according to the scale of training.

He has a broad knowledge of Dressage literature, including the writings, teachings and techniques of the masters. Dr Chopra believes by using Classical Dressage principles consisting of simple and logical training methods including work in hand, any horse can be trained to his or her maximum potential. Do to his unique experience in education at the University of Wisconsin Medical School, he is able to combine two disciplines with great success for both the horse and rider. Dr. Chopra helps riders show their horses effectively by having them execute the correct movements as prescribed in a particular dressage test.

The most important advice Dr. Chopra has for riders when they are riding and teaching their horses a particular movement is: **Ask often, be Satisfied with little, and Reward profusely;** Always remembering anger has NO place in dressage!

His approach in instruction is the classical methods to help you achieve Brilliance and Success in competition.

Dr. Chopra is available for judging and clinics.

In Dr. Chopra’s “other job” he practices Thoracic Surgery and General Surgery in Madison, WI. Dr. Chopra graduated with a MD 47 years ago.

Dr. Chopra welcome to Hawaii.

**“THE
DOCTOR”**
